

For Immediate Release

Mediacom Business Follows National 1-Gig Internet Launch with Major Speed Boost for Existing Broadband Customers

Businesses subscribing to lower speed tiers upgraded at no cost

Mediacom Park, NY – March 20, 2018 – Mediacom Business announced today that it is increasing broadband speeds for tens of thousands of business customers nationwide.

In 2016, Mediacom announced a 3-year, \$1 billion capital investment plan to, among other projects, upgrade and enhance the capacity of its fiber-rich digital network. Over the course of last year, Mediacom became the first major cable company to deploy 1-Gig Internet across its national footprint, bringing ultra-fast broadband to nearly all of the 3 million homes and businesses across the company's 22 state footprint.

"As a technology company, we know broadband fuels innovation and erases geographical boundaries of competition, particularly in rural America," said Dan Templin, Senior Vice President of Mediacom Business. "Because we expanded the top-line capabilities of our fiber-rich network, we are now able to significantly enhance all of our other existing service levels."

Effective April 1st, Mediacom Business will unveil the next phase of the company's network improvements. Existing Mediacom Business customers in the 10 Mbps, 20 Mbps and 50 Mbps tiers of service will be upgraded to new 60 Mbps, 100 Mbps and 300 Mbps tiers, respectively. This five to six-fold increase in speed will be completed at no charge to the customer.

"America's heartland is fast becoming a hub of new economic development," continued Mr. Templin. "With the new faster speeds from Mediacom Business, our customers will now have a distinct advantage over their competition."

About Mediacom Communications Corporation

Mediacom Communications Corporation is the 5th largest cable operator in the U.S. serving almost 1.4 million customers in smaller markets primarily in the Midwest and Southeast. Mediacom offers a wide array of information, communications and entertainment services to households and businesses, including video, high-speed data, phone, and home security and automation. Through Mediacom Business, the company provides innovative broadband solutions to commercial and public sector customers of all sizes, and sells advertising and production services under the OnMedia brand. More information about Mediacom is available at www.mediacomcable.com.
